EMT Testimonial

Real world success.

USAF White Paper

Based on this testing protocol, that the CIMR® Device is very effective at deactivating and eliminating aerosolized SARS-CoV-2 virus from the air.

HAI Reduction

University of Pittsburgh Medical Center Report 96.4-99.9% instantaneous reduction of Staphylococcus aureus, E-Coli, Listeria monocytogenes, Candida albicans, Streptococcus, and Pseudomonas

Mold Remediation

CNDRS (CIMR® Natural Disaster Recovery System) proven to return spaces to use in significantly shorter periods and lower costs. Furniture savings per room range between \$1500 and \$6000 depending on the number of upholstered items, mattresses, and heavily mold stained wood.

KSU Research Report

This preliminary study indicates that the CIMR® Cell was effective at inactivating Influenza A H1N1 virus on inoculated stainless coupons under the conditions of these tests.

Lackland AFB Case

The installation achieved zero COVID-19 transmission. This is critical to Lackland's mission.
