- Ø GreenSafe™

Our Solutions

We enable the biological shift by supercharging all-natural proven sanitizers, growth boosters, pest controllers and cleaners for centuries. Our patented proprietary processes convert these actives into submicroscopic polarized particles that act on the molecular level. Dramatic efficiency improvements end the need for hazardous product handling and residuals. Pathogens and our sanitizer have a charge attraction. People and plant pathogens are automatically instantly deactivated and destroyed. Indoor spaces sanitized 24-7-365 everywhere air goes. A clean start is assured by our hygienic cleaner and biopesticide. We break the cycle of contamination and infection by eliminating spores, eggs, and pests. Our programs work in the background with no risk to people, plants, materials, useful insects, and pets. Our nutrient enhancers end the plant scientist reported 50%+ loss when nutrients and moisture are not taken up by plants. Quality and yield improve. Agrichemical needs are eliminated or reduced. Grower report savings more than cover our costs before totaling the benefits. Our soil rescue step recovers previous nutrient applications bound up in the soil. Our soil enhancement products repair damage by chemicals to restore essential biological processes that assure optimum availability of water and nutrients throughout harvest cycles. Click on tabs and pull-down menus for product details, plant scientist proofs and user value briefs. Talk to us about making the biological shift. We are ready with a customized program matched to your needs.
