Experience the Value of Our Solutions.

CIMR® Tech and GreenSafe™ products make the shift from industrial chemicals to regenerative all-natural ingredients for soil rescue, hygienic cleaning, sanitizing and pest control. Breakthrough technology is applied to proven ingredients transforming them into submicroscopic polarized actives attracted to charged nutrients and pathogens

SoilClean™ removes contaminants and cures bound up soil so roots can take up trapped nutrients. Soil percolation improves for earlier land access. Yields and quality improve.

Soil Amendment restores healthy soil that reduces nutrient and water needs while delivering bigger yields and top quality.

CIMR® Technology

- Ø Sanitizer
- Ø Hygienic Cleaner
- Ø Bio-Pesticide

Sustainable replacements for harmful synthetic chemicals with all-natural products that work on the molecular level for improved performance and lower costs without hazards.

Nutrient Enhancers reduce chemical use while increasing yields and improving performance. Essential NPK is dramatically reduced below environment risk levels. All are 100% biodegradable, require no special handling and are toxin free.
