

The GreenSafe System™

Old Tech + New Tech = Syn to Bio Shift

Our system begins with 100% biodegradable sustainable ingredients known for centuries to boost growing, control harmful insects and disinfect air, fabric and surfaces. Then our proprietary processes turbocharge these ingredients by converting them into submicroscopic polar particles. These act in the molecular range for surprising results. For the first time products use the polarity of pathogens and foulants to remove them. Plus, they use the polarity of nutrients and water to increase soil fertility, then significantly improve uptake by and circulation in plants. Toxic chemicals are no longer needed. Chemical fertilizers are significantly reduced to increase profits not pollution.

Ø Bio Tech

Grow with Us – The saguaro cactus Here signifies our optimized water and nutrient programs for all you grow. Join us to break the cycle of synthetic chemical contamination, and health risk for all living things.

Paradigm Shift Milestones:

- 1987 – Topsoil Restoration Program
- 1997 – 100% Biodegradable Cleaner
- 2003 – Soil Rescue – Reduce Nitrogen
- 2005 – No Hazards Antimicrobial
- 2016 – No Hazards Bio-Pesticide

Industry Specific Systems

- Health Care
- Schools
- Greenhouse
- EMT Video
- USAF Strategic White Paper
- HAI (Hospital Acquired Infection) Control
- H1N1 (Swine Flu) Control
- Sick Building Cure
- CARB Ozone Certification
- Mold Nondestructive Remediation
- Greenhouse Cannabis

2 - GreenSafe Cleaner™

3 - Purely Green Bio-Pesticide

Ø Soil Tech

- Soil Amendment
- VRM BiLogik® Topsoil Restoration
- Soil Rescue Cases
- Salt Incursion Recovery Demonstration
- Grower Reports

Ø Nutrient Tech

- NOAA Dead Zone Video
- GreenSafe Plant Amendment™
- Cannabis Home Grow
- Cannabis Commercial Grow
- Hemp Field Test
- Alfalfa West PA Leaf Hoppers
- Soybean Field Test
- Alfalfa-Oats West Texas Drought
- Landscape (Sod Grower – Installer)
- Grower Reports

Ø App Tech
