

The GreenSafe™ System

Experience the Value of Our Solutions.

Our Solutions:

- Ø CIMR® Tech
- Ø VRM Biologik®
- Ø GreenSafe™

We apply the latest tech to old tech all-natural solutions known for 100+ years. The result is submicroscopic polarized active ingredients attracted to charged pathogens and nutrients. People and plant pathogens are efficiently defeated without hazardous chemicals. Root nutrient and water uptake plus flow throughout plants is dramatically increased. Efficiencies stop waste that pollutes. Minimized fertilizers brings maximized results. Submicroscopic actives unbind soil to recover past season's nutrients. Next generation soil restoration tech is applied to return soil to health and assure microbial species that add and efficiently store moisture and nutrients.
