

# GROWER REPORT

## Row Crops and Orchards

Scott Farms – Orchard and Row Crops – Owner Scott Dietrich and Family Reported with Permission on 9 March 2019

Gary Reid Green-Safe-Solutions Founder CEO Reported:

Scott Farms is a 12-acre family business with 12-acres of fruit trees, 30-acres of vegetables, and starter plants greenhouse.

Scott said his best year 2018 was beyond what he could ever imagine saying his tomato crop of 30-acres was an over 50% increase in tomato production and more than 35% two years in a row. He said looking back upon three growing seasons, Green-Safe adds 15-30% yield of top-quality tomatoes, peppers, and squash.

Scot said this is a photo of his indoor winter starts. He says: "Green-Safe is like medicine to plants."

The root development in the green house using Soil Amendment was amazing double the root stock overflowing through the bottom of his four-by-six-inch pots. Roots were over the top. They were everywhere. Containers were not big enough to hold all the roots. Scott said the roots were absorbing everything fed them. Also, he noticed that plants placed in the field did not go into shock. That has never happened before.

Here is another amazing fact. Scott said everyone always wore special clothing when they harvested because mosquitos were unbelievable. They would even bite your eyes. We had NO mosquitos in the past two years thanks to Green-Safe-Solutions.

The shelf life of his tomatoes tripled because he washed them off with a rag soaked in a product solution. They were shiny and he did not have one rotten tomato out of thousands. All come in rated U.S. No. 1 grade. That has never happened. Scott said his first harvest was 1920 pounds from the 30-acres.

Scott said, "Thank you and your team for helping us gain so much using your solutions. And I like the fact they are organic plant-based oils. Way to go. I will be placing my order shortly."
